***DETAILED ACTION***

1. This action is responsive to communications: original application filed 09/19/2003.
2. Claims 1-20 are currently pending in this application. Claims 1, 12, and 18 are independent claims.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to method for inserting input into an electronic document, classified in class 345, subclass 179.
  - II. Claims 18-20, drawn to a method for arranging content in an electronic page, classified in class 715, subclass 517.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, invention I has separate utility such as *positioning the content of the input document object on the page*; invention II has separate utility such as *moving the second line of text into alignment with the first line of text*.

Art Unit: 2176

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
